## **Influenza**

Influenza vaccine is recommended for all people older than 6 months.

The Government provides free vaccines for:

Adults >65 years

Children 6m-5years

Pregnant women

People of all ages with serious chronic illnesses

If you don't fit into any of these groups, you can purchase a vaccine from Thrive GP for \$20.

People who shouldn't have a flu vaccine:

People who have previously had a severe reaction to a vaccine

People who are immunosuppressed

If you are uncertain, please book an appointment (either telehealth or face to face) to discuss with your GP.

Remember that you shouldn't have a flu vaccine 2 weeks prior or within 2 weeks after to receiving a COVID vaccine.
